EDUCATION

The Chinese University of Hong Kong
Bachelor of Medicine and Bachelor of Surgery programme (MBChB) 2023 – 2026, 2027 – 2030 (Expected)
MSc in Research Medicine 2026 – 2027 (Expected)

PUBLICATIONS AND PATENTS

- (Submitted) **Chan S**, Leung Y, Meng H, Jin Y, So H, Tam L (2026) Pose-Robust Object Scale and Keypoint-Guided Finger Augmentations for Joint Localization in Sharp Scoring of Hand Radiographs
- **Chan S**, Leung Y, Meng H, Jin Y, So H, Tam L (2026) Beyond Bounding Boxes: Keypoint-Based Deep Learning for Automated Joint Localization in Radiographic Scoring of Rheumatoid Arthritis. Poster presentation. International Conference of Chinese Rheumatologists, Hong Kong.
- Lai-shan Tam, **Shu Ying Chan**, Yau-ming Leung, Ho So, Huan Meng, Yingzhao Jin. "A SYSTEM AND METHOD FOR ASSESSING A CONDITION OF A JOINT" **U.S. Provisional Patent.** 2026.
- Li Man Ho Tim, **Shu Ying Chan**, Yau-ming Leung, Tsang Wing Cheong. "AN AI-POWERED CONVERSATIONAL SYSTEM FOR ADAPTIVE, CANCER-AWARE EMOTIONAL SUPPORT WITH STRUCTURED THERAPEUTIC FRAMEWORK" **U.S. Provisional Patent.** 2026.
- Meng, H., Jin, Y., **Chan, S. Y.**, Leung, Y.-M., Tam, L.-S., & So, H. (2025). Automating Radiographic Damage Assessment in Rheumatoid Arthritis: A Narrative Review of Current Status and Future Perspectives. **Journal of Clinical Rheumatology and Immunology**, 25(02), 70–83. https://doi.org/10.1142/s2661341725300034

AWARDS

- The Innovation and Technology Scholarship 2025 (AI and Robotics), awarded by ITC, HSBC and HKFYG.
- Finalist, Spirit of Youth Award, The Spirit of Hong Kong Awards
- CUHK Outstanding Students Awards (Innovation and Invention).
- Ranked fifth out of ~400 teams in the ATEC Championship 2025, an international AI and Robotics competition, as the only undergraduate team among finalists.
- 1st runner up in the Robocon Hong Kong Contest 2025.
- Champion in the Prof. Charles K. Kao Student Creativity Awards.
- Champion in the Vice Chancellor's Cup of Student Entrepreneurship 2026.
- 1st runner up in the Vice Chancellor's Cup of Student Entrepreneurship 2025.

PROJECT FUNDINGS

RheumaVision
- Ideabooster Fund (HKD100K) for RheumaVision
- AWS x HKSTP Co-Ideation programme. (HKD100K + USD25K AWS credits) for RheumaVision

CancerCompanion
- CUHK Pre-Incubation Centre x HKSTP Co-Ideation programme. (HKD130K) for CancerCompanion

STARTUP EXPERIENCE

CancerCompanion Aug 2025 – Present
Founder & CEO
- Founded and leading a health tech startup developing a digital companion that provides cancer patients with reliable information and emotional support throughout their journey.
- Built and managing a 8-person team, with CUHK Psychiatry and Oncology faculty as advisors.
- Received ethics application for a formal research trial that will start soon.

RheumaVision Aug 2026 – Present
Co-founder
- Co-founded with CUHK Rheumatology faculty and postdocs.
- Developing a deep-learning pipeline for automated quantitative analysis of X-ray images.

RESEARCH EXPERIENCE

CUHK Department of Medicine & Therapeutics Aug 2025 – Present

Prof. Lai-Shan Tam, Prof. Ho So

- Designed and developing a novel deep-learning pipeline (US provisional patent filed) for automated quantitative analysis of X-ray images, expected to publish as first author.
- Published a literature review on automating radiographic damage assessment in rheumatoid arthritis.
- Pitched for and received ~HKD400k (200k cash + 200k credits) funding for the project.

Department of Psychiatry, CUHK Mar 2024 – Present

Dr. Li Man Ho Tim

- Conducting a systematic review and meta-analysis on chatbots for sleep improvement. (PROSPERO link: https://www.crd.york.ac.uk/PROSPERO/view/CRD42024594568), expected to publish as first author.

The Jockey Club School of Public Health and Primary Care, CUHK May – Aug 2024

Prof. Eng-kiong Yeoh

- Devised implementation strategies based on CFIR and ERIC and presented findings to an expert panel.
- Conducted literature review, case studies and qualitative analysis on responses from focus groups.

OTHER EXPERIENCE

CUHK Robotics Team Oct 2024 – Present

R&D Member

- Wrote a multi-thread C++ library for inter-robot communication through AprilTags and an LED.
- Designed and programming a custom PCB for benchmarking CAN socket performance in a Raspberry Pi, with and without the PREEMPT RT kernel patch.
- Trained an AI-based object detection model with YOLO, delivering accurate and quick real-time detections.
- Led the ATEC competition team, designing ROS-based simulations and programming a robotic arm and bipedal robot, and ranked fifth out of ~400 teams as the only undergraduate team among finalists.
- Programmed a mobile robot featuring an active caster and a ball-launching catapult for Robocon 2025 on a Raspberry Pi and Arduino Due with C++.
- Deployed and fine-tuned CAN communication networks between VESC motor controllers and main control units.
- Designed and implemented robot components in SolidWorks.

Cambridge Consulting Network Feb – Aug 2024

Student Consultant

- Consulted China's largest online traveling agency on leveraging their success in China to enter foreign markets.
- Conducted secondary research; analysed 130+ examples and presented part of the findings.

CUHK Strategic Investment Society Nov 2023 – Feb 2025

External Vice President

- Organized an international analyst exchange program, attracting hundreds of students from Cambridge, Wharton, Stanford, Oxford etc. to analyze global markets with students from CUHK.
- Orchestrated a highly successful investment competition with AmplifyME, attracting 50+ participants.
